

Innovative IG Therapy Management

Soleo Health provides comprehensive therapy management for patients requiring intravenous (IV) or subcutaneous (SC) immunoglobulin (Ig) therapy

Experience Matters

- Local, dedicated Ig team works together with providers to enhance positive patient outcomes
- 24/7 availability to pharmacists and registered nurses specifically trained in the administration of IVIG and SCIg, including HyQvia certification
- Access to over 250 million managed care covered lives (local, regional, national health plans and pharmacy benefit managers)
- Extensive, national nursing coverage to accommodate patients throughout the U.S.

Comprehensive IG Therapy Management

- Individualized patient care plans improving patient compliance and response to therapy
- Customized physician protocols and dosing guidance
- Extensive product selection of all intravenous and subcutaneous Ig products

Continuous Care Management

- Patient clinical monitoring throughout entire infusion by a registered nurse
- Disease specific patient assessments, capturing pertinent outcome data including side effects, response to therapy, infusion reactions and overall patient well-being
- Immediate intervention for adverse infusion reactions
- First dosing expertise in the home and alternate sites of care
- Successful patient transition from hospital or clinic to physician office, infusion suite or home

Therapeutic Considerations

- Selecting the most clinically appropriate product based on clinical condition and comorbidities
- Monitoring of patient weight and response to therapy to provide the most effective dosage, infusion rate and route of administration

Patient Advocacy

- Insurance benefit verification and authorization by IG reimbursement specialists
- Experience and success in overturning initial therapy denials
- Education on manufacturer copay programs and financial assistance
- Extensive support of advocacy groups for patients and families
- Detailed, therapy-specific patient and caregiver education

Proven. Positive. Outcomes.

Soleo Health's **proprietary clinical outcomes program** is based upon interdisciplinary, evidence based care designed to improve the care of patients with complex or chronic conditions. Our distinctive, consultative approach to delivering data-driven quality outcomes defines how we manage and measure care better.

We can provide customized detail reporting by therapy, disease state, drug, patient, physician, health system, ACO, payor and manufacturer.

Capturing Critical Patient Data Elements Through Clinical Assessments:

- | | | |
|--------------------------|-------------------------------|--------------------------|
| ✓ Catheter infections | ✓ Emergency department visits | ✓ Drug utilization |
| ✓ Clinical interventions | ✓ Patient experience | ✓ Adherence to therapy |
| ✓ Hospitalizations | ✓ Response to therapy | ✓ Side effect management |
