

# Living your life with CIDP

Learn more about a research study of an injectable investigational drug for adults diagnosed with **chronic inflammatory demyelinating polyneuropathy (CIDP)**.

To be considered for this study, you must:

- Be 18 years of age or older
- Have been diagnosed with CIDP or a CIDP variant (multifocal or motor)
- Have been receiving CIDP treatment for at least 3 months prior to joining this study, including:
  - Corticosteroids OR
  - Immunoglobulin therapy (IVIg or SCIg)
- Be willing to attend study clinic visits and be available for phone calls from the study doctor/staff

Additional criteria will apply.  
All study-related visits, assessments, and drugs will be provided at no cost.  
You may also be reimbursed for any study-related travel expenses.
